

New York SCR Demand Response

Earn payments for reducing energy consumption

Enel helps hundreds of organizations throughout New York earn money, save on energy costs, and mitigate carbon emissions with demand response (DR). How does it work? When the New York Independent System Operator (NYISO), the region’s electric grid operator, determines that it needs more supply to meet demand, it dispatches Enel’s demand response network, which is made up of local organizations that have agreed to reduce energy during times of high demand. With Enel, participating in demand response has never been easier.

Program overview

Program period	Year-round, 24x7x365
Advanced notification	2 hours, with stand-by warning provided 21 hours in advance
Payments	Capacity & energy
Dispatch duration	4 - 6 hours

What is demand response?

Demand response provides a no-risk, no-cost opportunity for commercial, institutional, and industrial organizations in New York to earn money and drive energy savings through grid operator and utility-sponsored DR programs. Your participation helps maintain reliable electricity throughout New York. Program participants receive recurring capacity payments for agreeing to curtail electricity consumption in response to abnormally high electricity demand and additional energy payments based on their performance during dispatches. Enel manages your participation from start to finish helping ensure that you receive the highest possible financial rewards.

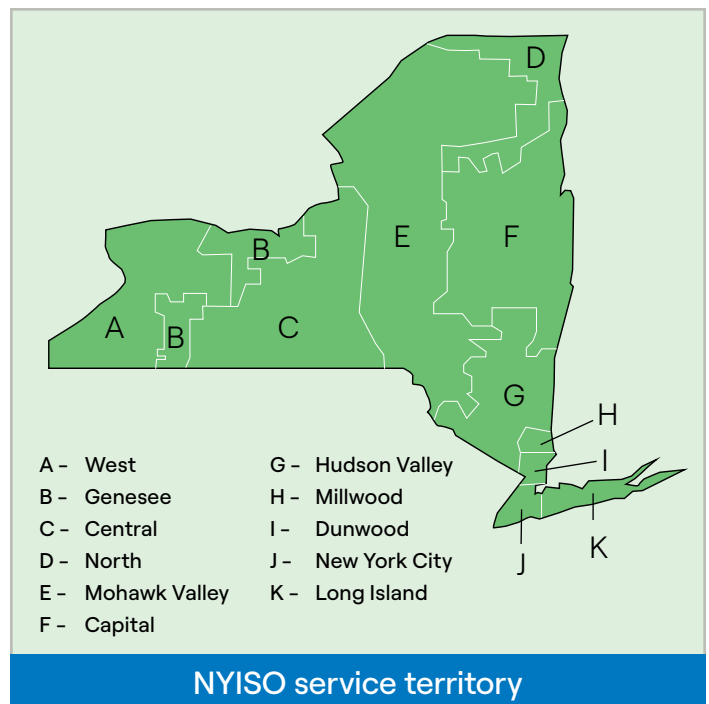

What are the benefits?

Maximize payments to your bottom line.

Enel has helped tens of thousands of customers maximize the financial benefits of demand response and has provided more than \$1B in payments to organizations like yours since 2003.

Reduce energy costs today.

Avoid costly peak demand spikes, monitor energy usage trends over time, and spot opportunities to better manage energy costs with our real-time energy intelligence software.

Support your community.

Your participation helps maintain reliable electricity throughout New York and provides a clean, cost-effective alternative to building new power plants in the community.

How do I participate?

Enel makes participation easy. We take care of the complex details so you can stay focused on running your business.

1. Our local experts work with you to identify your energy reduction potential and create a strategy that delivers

Buffalo, New York

maximum value with minimum impact on your operations. We outline these measures in a detailed Dispatch Participation Plan.

2. We may install necessary metering devices at your facility to establish communication with our Network Operations Center (NOC), so we can monitor your energy consumption levels in real-time.
3. Your site is then enrolled and ready to respond if and when a dispatch begins. At any time during a dispatch, you can [log in to the app](#) to view your performance in real-time. Throughout the process, we fully manage enrollment, measurement, verification, and payments on your behalf.

- Adjust HVAC equipment
- Dial back pumps
- Change settings in industrial freezers

Our customers find that many energy-intensive processes can simply be shifted by a few hours to facilitate dispatch participation. Ask us about our experience working with customers like you.

What can I expect during a dispatch?

Notification: When your local utility or grid operator anticipates the need for support, it dispatches the Enel network into action. Enel will notify you via email, phone, or SMS informing you when the dispatch will begin.

Response: At the start of the dispatch, your facility will reduce its electricity usage according to your pre-determined Energy Reduction Plan – either manually, or automatically through the NOC.

Support: Before, during, and after a dispatch, the NOC remains in communication with your facility. Our staff is available 24x7x365, supporting you to ensure that you achieve the highest possible levels of performance and payments.

What types of reductions can I make?

Enel has extensive experience creating reduction strategies that work within the operational limitations of a wide variety of unique facilities, including cold storage, manufacturers, food processors, universities, malls, office buildings and more. Common reduction examples include:

- Reduce non-essential lighting
- Modify manufacturing processes

Earn more with less effort

Boost your DR earnings by dual-enrolling in summer-only CSR or DLRP programs in addition to SCR. CSR and DLRP programs are now available in all 5 boroughs and throughout most of New York State.

How do I sign up?

Our experts are standing by to speak with you about your organization’s DR opportunity. Submit your information [here](#) to get started.

Enel provides on-demand access to your real-time energy data - giving you the information you need to perform your best during demand response events and to better manage overall energy costs.
